DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims, 1-6, 11-26, 30 and 31 drawn to a hydrogen storage and recovery apparatus, classified in class 48, subclass 190.
- II. Claims, 7-10 drawn to a hydrogen recovery unit, classified in class 423, subclass 658.
- III. Claims, 27-29 drawn to a method of recovering hydrogen from hydrogen storage, classified in class 429, subclass 200.

1. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a hydrogen recovery unit in other hydrogen generating systems. See MPEP § 806.05(d).

2. Inventions III and I are related as method and apparatus. The inventions are distinct if it can be shown that either: (1) the method as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different method. (MPEP § 806.05(e)). In this case invention III can be used as a method of operating another hydrogen storage and generating apparatus, distinct from invention I.

Art Unit: 1764

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and would require a separate search, restriction for examination purposes as indicated is proper.
